

## **PDASmart Announces Battery Upgrade for the iPod Video**

*Provides Extended Playing Time for Your 5th Gen Video iPod® More than 24 hours playing Videos Continuously*

Austin, TX ([PRWeb](#)) March 26, 2008 -- [PDASmart.com](#), the leading developer of iPod performance upgrades and accessories, announced today the immediate availability of an internal iPod battery upgrade for the iPod Video 30gb. The PDASmart upgrade installs in an existing 30gb iPod Video. A new rear casing is also sold with the battery to allow the extra space for the battery. This only extends the thickness of the iPod to about the size of the 60gb version Video. You will still be able to use all the same chargers and docking systems. The PDASmart Battery upgrade will extend playing times to over 45 hours on continuous song playing and an impressive 24 hour video playing time!

The extra battery capacity of the PDASmart Battery Upgrade is priceless wherever you go -- on an airplane, beach, or anywhere you'd like to relax with your iPod Video. "After hearing customers complain about the performance of their battery, we decided to move forward with the development of the 2200mah 5th Generation 30gb Video iPod to help customers gain the playing time they deserve", said CEO Trey Mattox of Optimistic Enterprises.

This battery kit will come with all parts and tools needed to do the repair yourself. If you have any doubt in your technical abilities, you can send your iPod Video into the PDASmart [iPod Repair](#) Center for the skilled technicians there to install. This upgrade is ONLY for the 30GB 5th Gen iPod Video as this is where the demand was. PDASmart.com will soon release 60gb/80gb versions at a later date for the 5th Gen and NEW 6th Gen Classic.

PDASmart Battery Upgrade Features:

- Provides extended playing capacity far exceeding any internal battery on the market
- Complete, internal solution - no external adapters or software drivers needed
- Plug-and-Play ease-of-use.

The PDASmart battery Upgrade is compatible with the Apple iPod Video 30GB models. The do-it-yourself kit includes all ipod parts and tools necessary for the installation. You can send your iPod Video (working or not) into the PDASmart iPod Repair Center and fix other issues you might be having with your iPod.

The Battery Upgrade is available immediately through the exclusive direct distributor PDASmart. PDASmart.com is your [iPod Parts](#) and repair specialists.
